Integrity[®]

“Take the first mover advantage”

Integrity[®] is an innovative, broad spectrum, Pre-emergence herbicide, powered by the new technology Kixor[®], that will control the toughest annual grasses and broadleaf weeds in your maize. The new active ingredient Kixor[®] brings a new dimension in control of weeds due to its mobility in soil which enables control of large seeded, deep germinating weeds as well.

Benefits to the farmer for choosing Integrity[®]

Keeps your field clean for a long time due to long-lasting effect

Feature	Benefit
Broad spectrum control of broadleaf and annual grasses	Saving time and efforts
Long-lasting residual activity	Makes you feel safe
Unique mode of action, excellent tool for resistance management	Value for money
Less water for activation, works in dry conditions	Safer investment
Very short waiting period for follow-up crops	Feeling the freedom in farming
Low dose rate and reasonable pack size	Ease of handling and storage
