Stellar® Star

“Still on time”

The broad-spectrum post emergence maize herbicide with widest flexibility of application.

Why Stellar® Star:

Stellar® Star is highly effective herbicide for post-emergence application in control of annual and perennial broadleaf weeds and annual grasses in maize. Stellar® Star has an adjuvant built in the formulation for optimum efficacy.

Benefits of choosing Stellar® Star

- The longest window of application which keeps you on time
- Post emergence application giving you flexibility in use
- Broad spectrum weed control saving time and effort
- Safe on crop, tough on weeds giving confidence to the farmer
- Two active ingredients with different modes of action which is excellent for resistance management
