

## Storm<sup>®</sup>

The fastest, most cost-effective solution for  
**indoor rat and mouse control**

- Proven single feed flocoumafen efficacy
- Highly palatable and durable block with a central hole
- Quick, easy and secure to use
- Maximum value, least cost pulse baiting

**Enabling the most effective solutions to your pest problems.**

## Proven, Single Feed Flocoumafen Efficacy

**Storm**® delivers the proven power of single feed anticoagulant rodenticide, flocoumafen to UK Pest Control Professionals as an ideal complement to the best difenacoum-based programmes.

The most potent modern rat killer, flocoumafen delivers a lethal dose in a single feed for the best possible control. It is also highly effective against mice and particularly valuable for controlling difficult rat and mouse populations.

As a special safeguard to non-target species UK legislation restricts flocoumafen to indoor use by professionals.

## Highly Palatable and Durable Block

**Storm**® is formulated as a crushed grain and wax block containing 0.005% flocoumafen.

Extensive professional use throughout Europe has shown it to be highly palatable to both rats and mice as well as extremely durable for the greatest efficacy in even the most challenging warm and wet environments.

## Quick, Easy and Secure to Use

**Storm**® makes it quick and easy both to put out fresh bait in pre-measured doses and to retrieve any unused rodenticide at the end of baiting.

A central hole allows each 20 g block to be anchored securely in baiting points for the best targeting and to prevent removal and the risk of foodstuff contamination.

## Maximum Value, Least Cost Pulse Baiting

**Storm**® can be used in the most cost-effective pulse baiting programmes involving strictly limited amounts of bait put down in successive cycles.

This ensures the most reliable whole population control by allowing less dominant later feeding rats and mice sufficient access to the bait once their more dominant early-feeding contemporaries are dead or dying.

As well as requiring markedly less bait than the traditional surplus baiting regimes employed with multi-feed rodenticides, pulse baiting significantly reduces both the amount of bait needed and the time required for baiting, leading to valuable total treatment cost savings.

This leaflet is intended as advice.  
The recommendations for use provided with each product should be carefully observed.

Storm® is a registered trademark of BASF. Storm® contains flocoumafen. Use biocides safely. Always read the label and product information before use.
