

Termidor®

The Ultimate Defense Against Termites

Mixing Instructions

1L Termidor® SC	Mix with 400L of Water
200 ml Termidor® SC	Mix with 80L of Water
Basic Mixing Ratio	10 ml Termidor® SC / 4L Water

Application

Foundation Treatment

Apply the *Termidor® SC water mixture* at the rate of 5L per Square Metre

Perimeter Treatment

Apply the *Termidor® SC water mixture* at the rate of 5L per Linear Metre

Termite Mound

Apply the *Termidor® SC water mixture* as follows:

- Small sized termite mound: < 4 holes - Apply 5L
- Medium sized termite mound: 4 holes - Apply 8L
- Large sized termite mound: > 4 holes - Apply 15L

Wood Preservation

Mix 5ml *Termidor®* with 4L water and apply as follows:

Apply 0.25L of this mixture per Square Metre

Apply the mixture by either dipping or brushing the building material thoroughly

- **Termidor®** is Your Trusted Brand for Termite Control; it has been used for over 20 years, protecting millions of homes worldwide.
- **Termidor®** offers long-term protection against termite attacks giving you peace of mind.
- **Termidor®** has the Unique “Transfer Effect” Ensuring maximum efficacy.
- **Termidor®** is used at low application rates assuring value for money.
- **Termidor®** is non-repellent and undetectable by Termites giving unmatched termite control.

No Home Is Safe from Termite Attack!

Whatever its age, construction type, or even location, your home can fall prey to formidable pests: termites! Every year, they cause damage costing hundreds of millions in Kenya alone. Globally, the figure is estimated to be in the billions. And it becomes a real disaster when you realize that insurance policies do not cover this kind of damage. For you as a homeowner, this can mean major repair costs – especially since termites work in secret. A long time can pass before the damage is detected. It's critical that you take action to treat your home before it's too late!

Keep Your Home Safe with **Termidor®**

When it comes to the devastation caused by termites, it's better to be prepared than to suffer! Don't wait for these pests to find your home, protect it with Termidor®, the world's number one termiticide! Benefiting from the latest technological innovations in the field of insecticides, Termidor® protects your home from the moment treatment begins, because – unlike other products – it's undetectable by termites. The result? Termidor® gives your home thorough, long-lasting protection.

Termidor®, the Effective Choice

As demonstrated by tests performed at top universities, the effectiveness of Termidor® is unrivaled – and unbeatable. Why? Simply because its revolutionary formulation allows it to act more quickly and with greater impact than any other anti-termite product, both inside and out. When used as a preventative measure, Termidor® even stops termites from entering your house by creating a genuinely undetectable insecticide barrier. Use Termidor® for long-term peace of mind!

Termidor®, Simply the Best Termiticide on the Market

Like many termite control products, Termidor® is a liquid formulation. But the comparison ends there: other termiticides merely have a repellent action – and are therefore detectable and avoidable by the insects – whereas Termidor® creates an undetectable chemical barrier around your home. Not sensing the danger, the termites do not avoid the treated area and thus find themselves contaminated. Furthermore, Termidor®'s unique transfer effect means that exposed termites pass the insecticide on to their fellow pests before dying – ensuring maximum efficiency!

Termidor®, More Effective Than a Trap

There are many termite trapping systems on the market, but their action is limited because the insecticide must make physical contact with the termite for it to be effective. There is no guarantee that the insect will make its way toward the trap, so instead it continues to cause damage. When the termite reaches the trap, it will still take the product many months to have any real impact in terms of parasite control. Termidor® is effective immediately, and its action is thorough both inside and outside building structures.

Unique Benefits, Unmatched Performance.

- **Termidor® has been used for over 20 years, protecting millions of homes.**
- **Termidor® offers long-term protection against termite attacks.**
- **Termidor® is non-repellent and has a transfer effect.**
- **Termidor® is used at low application rates.**
